Contents of Volume 187, No. 1

Peptide and Protein Structure

The kinetics of antibody binding to membrane antigens in solution and at the cell surface	D. W. MASON & A. F. WILLIAMS	1–20
Techniques for the verification of minimal phylogenetic trees illustrated with ten mammalian haemoglobin sequences	D. PENNY, M. D. HENDY & L. R. FOULDS	65–74
Purification and properties of lung lectin. Rat lung and human lung β-galactoside-binding proteins	J. T. POWELL	123–129
Distance calculation of residues neighbouring to lysozyme antigenic sites. Site-neighbouring residues whose evolutionary substitution can modify the characteristics and binding energy of the sites	M. Z. ATASSI & A. L. KAZIM	163–172
A mass-spectrometric method for the estimation of the ratio of γ-carboxyglutamic acid to glutamic acid at specific sites in proteins. Application to the *N*-terminal region of bovine prothrombin	K. ROSE, J. D. PRIDDLE, R. E. OFFORD & M. P. ESNOUF	239–243
Isolation, characterization and opiate activity of β-endorphin from the pituitary gland of the ostrich, *Struthio camelus*	R. J. NAUDÉ, W. OELOFSEN & R. MASKE	245–248
Specific quantification of mouse and human keratin proteins by radioimmunoassay	S. H. YUSPA, M. C. POIRIER, J. R. HARNESS, D. R. OLSOM & P. M. STEINERT	281–284

Enzymes and Enzyme Kinetics

Polyol-pathway enzymes of human brain. Partial purification and properties of aldose reductase and hexonate dehydrogenase	M. M. O'BRIEN & P. J. SCHOFIELD	21–30
Purification and characterization of α-L-fucosidase from the liver of a fucosidosis patient	J. A. ALHADEFF & G. L. ANDREWS-SMITH	45–51
Adenosine diphosphate ribose transferase from baby-hamster kidney cells (BHK-21/C13). Characterization of the reaction and product	H. M. FURNEAUX & C. K. PEARSON	91–103
The evaluation of initial rates in the presence of background noise	F. JAUKER	141–146
N-Acetylation of drugs. Observations on the properties of partially purified *N*-acetyltransferase from peripheral blood of rabbit	G. S. DRUMMOND, H. C. KELKER & W. W. WEBER	157–162
Partial purification and characterization of a new fast-acting plasmin inhibitor from human platelets. Evidence for non-identity with the known plasma proteinase inhibitors	M. SANDBJERG HANSEN & I. CLEMMENSEN	173–180
Substrate specificity and other properties of the inducible S3 secondary alkylsulphohydrolase purified from the detergent-degrading bacterium *Pseudomonas* C12B	D. J. SHAW, K. S. DODGSON & G. F. WHITE	181–190
Appendix: An improved procedure for the preparation of alkyl sulphate esters suitable for the study of secondary alkylsulphohydrolase enzymes	G. F. WHITE, V. LILLIS & D. J. SHAW	191–196
Separation of putrescine oxidase and spermidine oxidase in foetal bovine serum with the aid of a specific radioactive assay of spermidine oxidase	W. A. GAHL, A. M. VALE & H. C. PITOT	197–204
Bromoperoxidases from *Penicillus capitatus*, *Penicillus lamourouxii* and *Rhipocephalus phoenix*	D. G. BADEN & M. D. CORBETT	205–211
Studies on methanol dehydrogenase from *Hyphomicrobium* X. Isolation of an oxidized form of the enzyme	J. A. DUINE & J. FRANK, JR.	213–219

The prosthetic group of methanol dehydrogenase. Purification and some of its properties	J. A. DUINE & J. FRANK, JR.	221–226
Inhibition of monkey liver serine hydroxymethyltransferase by Cibacron Blue 3G-A	K. S. RAMESH & N. APPAJI RAO	249–252
Substrate stabilization of the palmitoyl-coenzyme A hydrolase activity of rat submaxillary gland	T. E. KNAUER, J. J. GURECKI & G. R. KNAUER	269–272
Regulation of nitrogenase A and R concentrations in *Rhodopseudomonas capsulata* by glutamine synthetase	D. C. YOCH	273–276
Metalloproteins		
Low-level chemiluminescence of hydroperoxide-supplemented cytochrome *c*	E. CADENAS, A. BOVERIS & B. CHANCE	131–140
Nucleotides, Nucleic Acids and Nucleoproteins		
Distribution of sequences common to the 25–28S-ribonucleic acid genes of *Xenopus laevis* and *Neurospora crassa*	R. A. COX & R. D. THOMPSON	75–90
Sequence organization in nuclear deoxyribonucleic acid from *Physarum polycephalum*. Physical properties of foldback sequences	P. L. JACK & N. HARDMAN	105–113
Incorporation of 5-substituted uracil derivatives into nucleic acids. The isolation and γ-radiation-sensitivity of bacteriophage T3 containing the thymine analogue 5-vinyluracil	E. T. J. CHELTON, M. DUGGAN, R. N. HUNSTON, A. S. JONES, M. K. O'LEARY, D. J. OVERTON & R. T. WALKER	257–260
The detection of messenger ribonucleic acid sequences in heterogeneous nuclear ribonucleic acid fractions of the oestrogen-stimulated rat uterus	S. AZIZ & J. T. KNOWLER	265–267
Lipids		
Utilization of membranous lipid substrates by membranous enzymes. Hydrolysis of sphingomyelin in erythrocyte 'ghosts' and liposomes by the membranous sphingomyelinase of chicken erythrocyte 'ghosts'	M. RECORD, A. LOYTER & S. GATT	115–121
Glycerol *vic*-cyclic phosphate in rat tissues	N. G. CLARKE & R. M. C. DAWSON	253–255
Retention of the 4-*pro-R* hydrogen atom of mevalonate at C-2,2′ of bacterioruberin in *Halobacterium halobium*	I. E. SWIFT & B. V. MILBORROW	261–264
Membranes		
Proteins of the kidney microvillar membrane. Asymmetric labelling of the membrane by lactoperoxidase-catalysed radioiodination and by photolysis of 3,5-di[^{125}I]iodo-4-azidobenzenesulphonate	A. G. BOOTH & A. J. KENNY	31–44
An electrophoretic study of endogenous phosphorylation *in vitro* of the polypeptides of microsomal membrane fractions of mouse liver	M. BEHAR-BANNELIER & R. K. MURRAY	147–156
Characteristics of a copper-dependent cross-linking reaction between two forms of cytochrome *P*-450 in rabbit-liver microsomal membranes	P. R. MCINTOSH & R. B. FREEDMAN	227–237
Selective release of plasma-membrane enzymes from rat hepatocytes by a phosphatidylinositol-specific phospholipase C	S. D. SHUKLA, R. COLEMAN, J. B. FINEAN & R. H. MICHELL	277–280
Carbohydrates and Complex Carbohydrates		
Glycoproteins from the cell wall of *Phaseolus coccineus*	M. A. O'NEILL & R. R. SELVENDRAN	53–63
Physical Biochemistry		
Drug-induced conversion of liver haem into modified porphyrins. Evidence for two classes of products	F. DE MATTEIS & A. H. GIBBS	285–288

Peptide and Protein Structure

Description of the quaternary structure of tetrameric proteins. Forms that show either right-handed or left-handed symmetry at the subunit level	E. J. MILNER-WHITE	297–302
The native forms of the phycobilin chromophores of algal biliproteins. A clarification	P. O'CARRA, R. F. MURPHY & S. D. KILLILEA	303–309
Structures and apoprotein linkages of phycoerythrobilin and phycocyanobilin	S. D. KILLILEA, P. O'CARRA & R. F. MURPHY	311–320
Evidence that glicentin contains the entire sequence of glucagon	J. J. HOLST	337–343
α-Bromo-4-amino-3-nitroacetophenone, a new reagent for protein modification. Modification of the methionine-290 residue of porcine pepsin	N. I. TARASOVA, G. I. LAVRENOVA & V. M. STEPANOV	345–352
Isolation and characterization of the thymus–brain antigen (analogous to Thy-1 antigen) from human brain	A. HAMANN, R. ARNDT, P. KLEIN & H.-G. THIELE	403–412
Isolation of the smallest component of silk protein	S. TOKUTAKE	413–417
The stoichiometry and location of troponin I- and troponin C-like proteins in the myofibril of the bay scallop, *Aequipecten irradians*	W. LEHMAN, J. F. HEAD & P. W. GRANT	447–456
Crystal-forming proteins of *Bacillus thuringiensis*. The limited hydrolysis by endogenous proteinases as a cause of their apparent multiplicity	G. G. CHESTUKHINA, I. A. ZALUNIN, L. I. KOSTINA, T. S. KOTOVA, S. P. KATRUKHA & V. M. STEPANOV	457–465
Characteristics of solubilized human-somatotropin-binding protein from the liver of pregnant rabbits	T. TSUSHIMA, N. SASAKI, Y. IMAI, F. MATSUZAKI & H. G. FRIESEN	479–492
A new human erythrocyte variant (Ph) containing an abnormal membrane sialoglycoprotein	M. J. A. TANNER, D. J. ANSTEE & W. J. MAWBY	493–500
A protein activator of Mg^{2+}-dependent, Ca^{2+}-stimulated ATPase in human erythrocyte membranes distinct from calmodulin	D. MAULDIN & B. D. ROUFOGALIS	507–513
Peptide fragmentation suitable for solid-phase microsequencing. Use of *N*-bromosuccinimide and BNPS-skatole {3-bromo-3-methyl-2-[(2-nitrophenyl)thiol]-3*H*-indole}	P. E. HUNZIKER, G. J. HUGHES & K. J. WILSON	515–519
Heparin enhances the rate of binding of fibronectin to collagen	S. JOHANSSON & M. HÖÖK	521–524
Properties of a glycopeptide isolated from human Tamm–Horsfall glycoprotein. Interaction with leucoagglutinin and anti-(human Tamm–Horsfall glycoprotein) antibodies	A. ABBONDANZA, C. FRANCESCHI, F. LICASTRO & F. SERAFINI-CESSI	525–528
Isolation and characterization of riboflavin-binding protein from pregnant-rat serum	K. MUNIYAPPA & P. R. ADIGA	537–540

Enzymes and Enzyme Kinetics

Fatty acid specificities of microsomal acyltransferase esterifying positions-1 and -2 of acylglycerols in mammary glands from lactating rats	S. M. COOPER & M. R. GRIGOR	289–295
Modification and identification of glutamate residues at the arginine-recognition site in the catalytic subunit of adenosine 3′:5′-cyclic monophosphate-dependent protein kinase of rabbit skeletal muscle	M. MATSUO, C.-H. HUANG & L. C. HUANG	371–379
A peripheral and an intrinsic enzyme constitute the cyclic AMP phosphodiesterase activity of rat liver plasma membranes	R. J. MARCHMONT & M. D. HOUSLAY	381–392
Kinetic analysis of the role of lipoic acid residues in the pyruvate dehydrogenase multienzyme complex of *Escherichia coli*	M. C. AMBROSE-GRIFFIN, M. J. DANSON, W. G. GRIFFIN, G. HALE & R. N. PERHAM	393–401

Studies of inhibition of rat spermidine synthase and spermine synthase	H. HIBASAMI, R. T. BORCHARDT, S. Y. CHEN, J. K. COWARD & A. E. PEGG	419–428
Human FAD-dependent NAD(P)H diaphorase	Y. H. EDWARDS, J. POTTER & D. A. HOPKINSON	429–436
Isolation of a detergent-solubilized maltase/glucoamylase from rat intestine and its comparison with a maltase/glucoamylase solubilized by papain	L. M. Y. LEE, A. K. SALVATORE, P. R. FLANAGAN & G. G. FORSTNER	437–446
The effects of modification with *N*-bromosuccinimide on the binding of ligands to dihydrofolate reductase	J. W. THOMSON, G. C. K. ROBERTS & A. S. V. BURGEN	501–506
Cross-linking preserves conformational changes induced in penicillinase by its substrates	Y. KLEMES & N. CITRI	529–532
Comparison of the α-mannosidases in fibroblast cultures from patients with mannosidosis and mucolipidosis II and from controls	D. J. J. HALLEY, B. G. WINCHESTER, L. J. BURDITT, A. D'AZZO, D. ROBINSON & H. GALJAARD	541–543
Metalloproteins		
Intracellular localization, isolation and characterization of two distinct varieties of superoxide dismutase from *Neurospora crassa*	L. E. A. HENRY, R. CAMMACK, J.-P. SCHWITZGUEBEL, J. M. PALMER & D. O. HALL	321–328
Reactivation *in vitro* of zinc-requiring apo-enzymes by rat liver zinc-thionein	A. O. UDOM & F. O. BRADY	329–335
Optical properties of Japanese-lacquer-tree (*Rhus vernicifera*) laccase depleted of type-2 copper(II). Involvement of type-2 copper(II) in the 330nm chromophore	L. MORPURGO, M. T. GRAZIANI, A. FINAZZI-AGRÒ, G. ROTILIO & B. MONDOVI	361–366
Titrations with ferrocyanide of Japanese-laquer-tree (*Rhus vernicifera*) laccase and of the type 2 copper-depleted enzyme. Interrelation of the copper sites	L. MORPURGO, M. T. GRAZIANI, A. DESIDERI & G. ROTILIO	367–370
Nucleotides, Nucleic Acids and Nucleoproteins		
Digestion of micrococcal nuclease of mouse submandibular-salivary-gland chromatin	G. J. SMITH & C. ROWLATT	353–360
Subnuclear fractionation by mild micrococcal-nuclease treatment of nuclei of different transcriptional activities causes a partition of expressed and non-expressed genes	G. J. DIMITRIADIS & J. R. TATA	467–477
Physical Biochemistry		
Crystallographic and molecular-orbital studies on the geometry of antifolate drugs	W. E. HUNT, C. H. SCHWALBE, K. BIRD & P. D. MALLINSON	533–536

Contents of Volume 187, No. 3

Peptide and Protein Structure		
The primary structure of the calcium-transporting adenosine triphosphatase of rabbit skeletal sarcoplasmic reticulum. Soluble tryptic peptides from the succinylated carboxymethylated protein	G. ALLEN	545–563
Primary structure of the calcium ion-transporting adenosine triphosphatase of rabbit skeletal sarcoplasmic reticulum. Soluble peptides from the α-chymotryptic digest of the carboxymethylated protein	G. ALLEN	565–575
Primary structure of the calcium ion-transporting adenosine triphosphatase from rabbit skeletal sarcoplasmic reticulum. Some peptic, thermolytic, tryptic and staphylococcal-proteinase peptides	G. ALLEN, R. C. BOTTOMLEY & B. J. TRINNAMAN	577–589

419–428	The primary structure of the calcium ion-transporting adenosine triphosphatase protein of rabbit skeletal sarcoplasmic reticulum. Peptides derived from digestion with cyanogen bromide, and the sequences of three long extramembranous segments	G. Allen, B. J. Trinnaman & N. M. Green	591–616
429–436			
437–446	Interaction of wheat monomeric and dimeric protein inhibitors with α-amylase from yellow mealworm (*Tenebrio molitor* L. larva)	V. Buonocore, F. Gramenzi, W. Pace, T. Petrucci, E. Poerio & V. Silano	637–645
501–506	Chemical identity of tryptensin with angiotensin	K. Arakawa, M. Yuki & M. Ikeda	647–653
529–532	Antibody combining sites can be mimicked synthetically. Surface-simulation synthesis of the phosphorylcholine-combining site of myeloma protein M-603	A. L. Kazim & M. Z. Atassi	661–666
541–543	Preparation and characterization of chemically defined oligomers of rabbit immunoglobulin G molecules for the complement binding studies	J. K. Wright, J. Tschopp & J.-C. Jaton	767–774
	Dimeric, trimeric and tetrameric complexes of immunoglobulin G fix complement	J. K. Wright, J. Tschopp, J.-C. Jaton & J. Engel	775–780
321–328	A stopped-flow study of the cupric ion oxidation of adult-human haemoglobin	T. Brittain	803–807
329–335	Factor $\overline{D}$ of the alternative pathway of human complement. Purification, alignment and *N*-terminal amino acid sequences of the major cyanogen bromide fragments, and localization of the serine residue at the active site	D. M. A. Johnson, J. Gagnon & K. B. M. Reid	863–874
361–366			
367–370	The complete amino acid sequence of three alcohol dehydrogenase alleloenzymes (Adh^{N-11}, Adh^{S} and Adh^{UF}) from the fruitfly *Drosophila melanogaster*	D. R. Thatcher	875–883
	Appendix: Secondary-structure prediction from the sequence of *Drosophila melanogaster* (fruitfly) alcohol dehydrogenase	D. R. Thatcher & L. Sawyer	884–886
353–360	Amino acid sequence around lipoic acid residues in the pyruvate dehydrogenase multienzyme complex of *Escherichia coli*	G. Hale & R. N. Perham	905–908
467–477	Characterization of the keratin filament subunits unique to bovine snout epidermis	P. M. Steinert, W. W. Idler & M. L. Wantz	913–916
RD 533–536			
	Enzymes and Enzyme Kinetics		
	Characterization of the intermediates in the reaction of membrane-bound mixed-valence-state cytochrome oxidase with oxygen at low temperatures by optical spectroscopy in the visible region	G. M. Clore	617–622
	Purification and physicochemical, kinetic and immunological properties of allosteric serine hydroxymethyltransferase from monkey liver	K. S. Ramesh & N. Appaji Rao	623–636
545–563			
	Acetyl-coenzyme A carboxylase from avocado (*Persea americana*) plastids and spinach (*Spinacia oleracea*) chloroplasts	S. B. Mohan & R. G. O. Kekwick	667–676
565–575	Covalent binding of proteinases in their reaction with α_2-macroglobulin	G. S. Salvesen & A. J. Barrett	695–701
	Preliminary observations on alcohol dehydrogenases in *Comamonas terrigena* that exhibit stereospecificity towards secondary alcohols	C. H. Barrett, K. S. Ddogson, G. F. White & W. J. Payne	703–709
577–589			
	Thermodynamics and stoicheiometry of the binding of substrate analogues to uricase	T. G. Conley & D. G. Priest	727–732
	Non-classical inhibition of uricase by cyanide	T. G. Conley & D. G. Priest	733–738

Deviations from Michaelis–Menten kinetics. The possibility of complicated curves for simple kinetic schemes and the computer fitting of experimental data for acetylcholin-esterase, acid phosphatase, adenosine deaminase, arylsulphatase, benzylamine oxidase, chymotrypsin, fumarase, galactose dehydrogenase, β-galactosidase, lactate dehydrogenase, peroxidase and xanthine oxidase	W. G. BARDSLEY, P. LEFF, J. KAVANAGH & R. D. WAIGHT	739–76
The ^{1}H nuclear-magnetic-resonance spectroscopy of cobalt(II)-β-lactamase II	A. GALDES, H. A. O. HILL, G. S. BALDWIN, S. G. WALEY & E. P. ABRAHAM	789–79
Kinetics of inactivation of β-lactamase I by 6β-bromopenicillanic acid	V. KNOTT-HUNZIKER, B. S. ORLEK, P. G. SAMMES & S. G. WALEY	797–8
Reduction and activity of cytochrome *c* in the cytochrome *c*–cytochrome aa_3 complex	B. C. HILL & P. NICHOLLS	809–8
The kinetic properties and reaction mechanism of histamine methyltransferase from human skin	D. M. FRANCIS, M. F. THOMPSON & M. W. GREAVES	819–8
Graphical rules for enzyme-catalysed rate laws	K.-C. CHOU & S. FORSÉN	829–8
Association of glyceraldehyde 3-phosphate dehydrogenase with the membrane of the intact human erythrocyte	S. KEOKITICHAI & J. M. WRIGGLESWORTH	837–8
Mechanistic studies of carboxypeptidase Y from *Saccharomyces cerevisiae*. pH and pD profiles and inactivation at low pH (pD) values	W. T. CHANG & K. T. DOUGLAS	843–8
The action of chloride peroxidase on 4-chloroaniline. *N*-Oxidation and ring halogenation	M. D. CORBETT, B. R. CHIPKO & A. O. BATCHELOR	893–9
Fluorimetric assays for cathepsin B and cathepsin H with methylcoumarylamide substrates	A. J. BARRETT	909–9
Lipids		
The serum competitor of oestrogen-rat α_1-foetoprotein interactions. Identification as a mixture of non-esterified fatty acids	G. VALLETTE, C. BENASSAYAG, L. SAVU, J. DELORME, E. A. NUNEZ, J. DOUMAS, G. MAUME & B. F. MAUME	851–8
Membranes		
The isolation of human-erythrocyte band-3 polypeptide labelled with a photosensitive hydrophobic probe	E. WELLS & J. B. C. FINDLAY	719–7
Carbohydrates and Complex Carbohydrates		
Interactions between bovine cornea proteoglycans and collagen	P. SPEZIALE, A. BARDONI & C. BALDUINI	655–6
The carbohydrate moiety of band-3 glycoprotein of human erythrocyte membranes	T. TSUJI, T. IRIMURA & T. OSAWA	677–6
Immunochemical analysis of cartilage proteoglycans. Radioimmunoassay of the molecules and the substructures	J. WIESLANDER & D. HEINEGÅRD	687–6
Sheep gastric mucins as a source of blood-group-I and -i antigens	E. WOOD, E. F. HOUNSELL, J. LANGHORNE & T. FEIZI	711–7
Proteoglycans in normal and severely osteoarthritic human cartilage	N. VASAN	781–7
Synthesis of biliverdin and bilirubin 1-*O*-acyl-β-D-glucopyranuronic acids	F. COMPERNOLLE	857–6
Collagen–proteoglycan interactions. Localization of proteoglycans in tendon by electron microscopy	J. E. SCOTT	887–9
